## QUARTERLY NEWSLETTER

Dear Supporters,

As we enter the new financial year, I want to take a moment to reflect on our achievements, challenges, and opportunities to achieve our common goals and priorities.

I am proud to say that we have made significant progress towards finding ways to end malnutrition in India. Our programs have reached thousands of vulnerable communities, providing them with access to food, water, and essential health services. In doing so, we are able to gather useful insights and developed models that might prove useful in our fight against hunger and malnutrition.

Nonetheless, this year has not been without its challenges. As the world and communities are recovering from the profound impacts of COVID-19 pandemic, we have been quick to adapt to the new realities and find innovative solutions to continue our work within the communities. I want to thank each and every one of you for your dedication and hard work during these difficult times over the past few years.

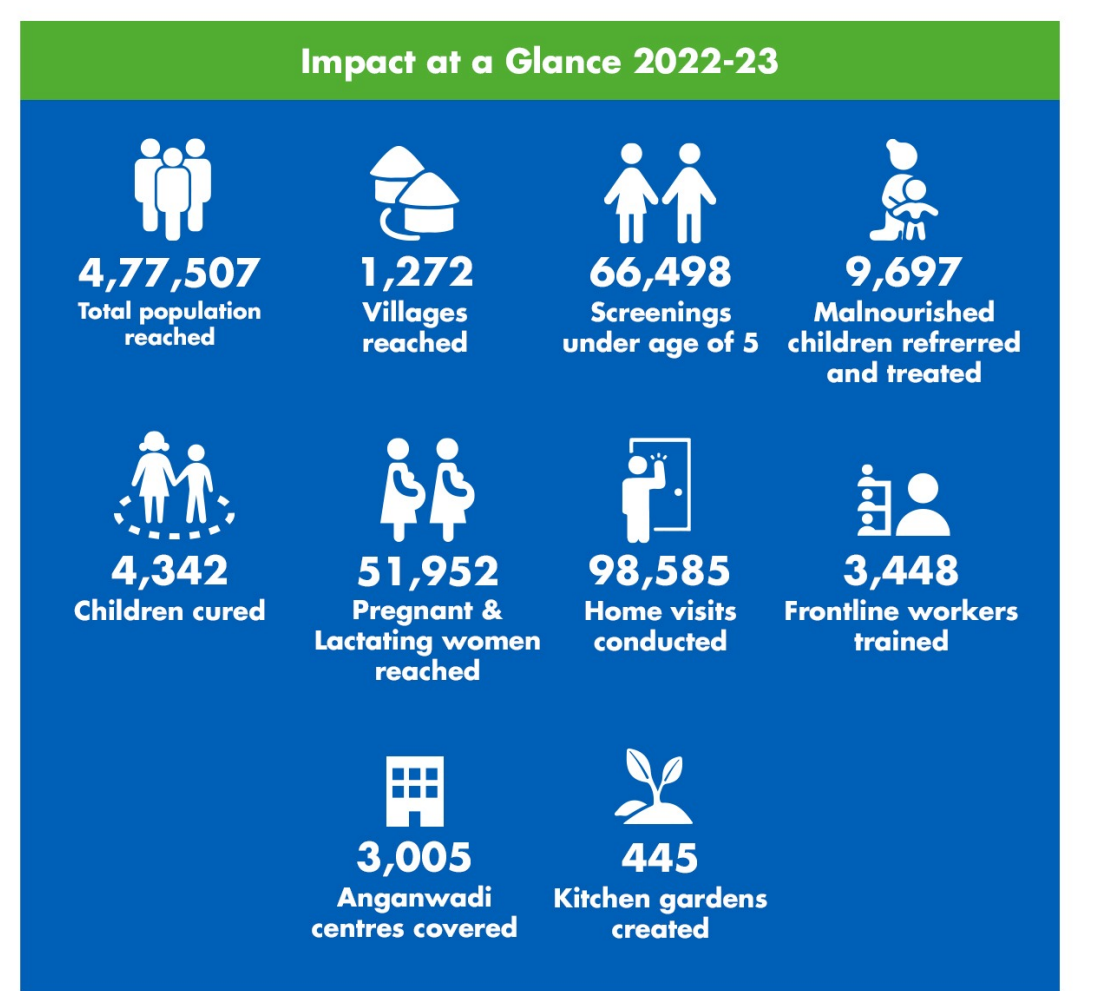

Looking ahead, there are many opportunities available and responsibilities to fulfill for us if we have to respond to the challenge of child malnutrition effectively. For this, I cannot emphasize enough on building strong partnerships with communities and stakeholders, and leveraging technology to enhance the efficiency and effectiveness of our programs. We must also continue to promote and prioritize diversity, equity, and inclusion in all aspects of our work, and ensure that we are constantly learning and evolving as an organization and team.

In this financial year, I am confident that we will continue to make a positive impact in the fight against malnutrition in India. Let us remain committed to our mission, and work together to build a brighter future for all.

Thank you.

Sincerely,

- Vinay Iyer, Chief Executive Officer

### What our supporters have to say

When we educate a pregnant woman on nutrition and feed young lives, we are actually investing in the future of our nation, by providing them an equal opportunity at life. It is a humbling experience to support young lives in some of the remotest districts of India. We are proud to have partnered with Action Against Hunger, working towards improving nutrition for pregnant, lactating mothers and children up to five years. Spreading the word to #EliminateMalnutrition, we encourage other corporates to support the cause and realise the nation's common goal of making India malnourishment free by 2030. As with a malnourishment free society, where healthy children grow up to their full potential, we can truly liberate individuals to pursue their dreams and ambitions, thereby fuelling the progress of our nation.

At Action against Hunger, we drive change from the ground up, to make this world free from hunger.

Since inception in 1979, we have led the global fight against hunger. Our work has impacted the lives of 15 million individuals, through a network of 7100 humanitarian professionals across 50 countries. In India, our operations from the grassroots upwards, are focused on taking decisive action against the causes and effects of malnutrition. We equip people with knowledge and awareness, so they can see their children grow up strong, and for whole communities to prosper.
